Web developer with a background in writing and researching. Excellent communication and problem-solving skills. Graduate of University of California, Davis with a Certificate in Full Stack Web Development.

Skills

- MongoDB, Mongoose
- GraphQL
- Writing and Editing in AP Style
- Search Engine Optimization
- NodeJS and Express
- ReactJS
- Bootstrap and TailwindCSS
- Writing and Speaking Spanish

Professional Experience

Pearl - Social Media Manager - Remote 2021 - Present

Wrote and posted content on a variety of social media platforms, monitored eight accounts, and interacted with other posts. Used Webflow to add content to the company website.

The Borgen Project - Writer Intern - Remote 2020

Wrote weekly articles including primary and secondary research for an anti-poverty nonprofit. Fundraised over \$900. Mobilized individuals to donate and reach out to Congress.

Integrated Marketing Systems - Regional Research Manager - San Diego, CA 2018-2019

Collected and interpreted primary documents. Contacted public officials by phone and email. Tracked and updated published projects. Fostered relationships with over 1,000 public agencies.

Projects

GeekSeek - UCSD Extension Coding Bootcamp 2022

A dating site for nerds and geeks. Users create an account, answer questions for their profile, and can view the profiles of other users. I built the controllers and the front-end JavaScript, and added login functionality.

<https://github.com/JMYoung93/GeekSeek>

Musician Finder - UCSD Extension Coding Bootcamp 2021

Users can look up their favorite bands or artists to find a variety of information about them. I built the majority of the Javascript functionality, including using multiple APIs to retrieve information based on a single user request.
